

DELTA GENERATES MORE ELECTRICITY

If you're not making electricity, you're paying for it!

FIRST TO RISE, LAST TO SLEEP.

Delta's Home Series Wi-Fi inverters have one of the lowest start-up voltages (35 Volts DC) and the lowest shutdown voltages (30 Volts DC). The longer an inverter is "Awake", the longer it makes electricity, and the more savings you will make.

DELTA MAKES MORE ENERGY.

Delta's 5kW three phase inverter maintains full energy output in ambient temperatures of up to 52 degrees Celsius.

YOUR PROVIDER IS A TRUE PARTNER WITH DELTA

Retailers, installers and end users have direct access to Delta's service team, located in Notting Hill, Victoria.

Our qualified engineers will offer support with design assistance as well as warranty claims.

DELTA, NOT JUST INVERTERS

Delta, a global powerhouse since 1971, is the world's largest power supply manufacturer and producer of many products you use everyday.

Hospital-grade UPS, Electric Vehicle Chargers, Bio Tech devices, Projectors and even chargers for your laptop and / or smartphone.

Join top global brands in choosing Delta to power your lifestyle.

DELTA CONNECT

See your solar savings in real time with MyDeltaSolar app.

HOME SERIES ONLINE MONITORING

Delta's Home Series Wi-fi inverters are easily connected using your smartphone or PC to the Delta cloud over your Wi-Fi network or point to point without Wi-Fi.

Energise and go! It's that easy!

PRE-SET FOR AUSTRALIA

All of Delta's Home Series Wi-Fi inverters are pre-loaded from the factory to the Australian AS4777 requirements.

AN INVERTER FOR ALL APPLICATIONS

Delta inverters are available in:

- ▶ single phase 2.5kW, 3kW, 4kW and Hybrid 5kW
- ▶ three phase 5kW, 10kW and 30kW
- ▶ 6kWh battery

Majority of Delta's inverters are used in commercial installations that apply these industry specifications and design qualities in both single and three phase inverters.

DELTA PROVIDES A FULL WARRANTY

Delta's comprehensive warranty covers both inverter, parts and labour. Some manufacturers separate warranty, where you will receive parts and labour for the first half and then "parts" only for the second half.
